Meno-Chat: An Assistive Chatbot Against Menstrual Problems and Menopause Health for Women

Name: Dr. Nabeel Mohammed

Designation: Associate Professor

Organisation: Department of Electrical and Computer Engineering, North South University

Relevance

- 1.9 billion people are able menstruate. 500 million are unable to attain proper menstrual health [1].
- Menstrual abnormality leads to health complications[2], lifestyle disruption[3], anxiety disorder[3], deadly diseases (e.g PCOS), etc.
- Taboos and stigmas attached to menstruation lead to an overall culture of silence around the topic, resulting in limited information on menstruation and menstrual hygiene.
- Several studies suggest **providing relevant information as a major solution** to all types of menstrual problems.

Fig 2: Teach students about MHM [5]

Fig 1. Had studies, and social activities interrupted[4]

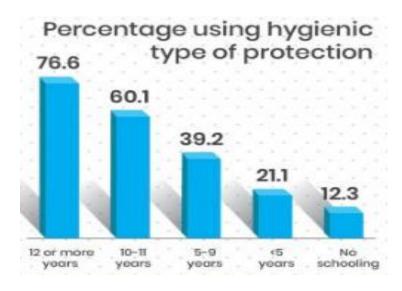

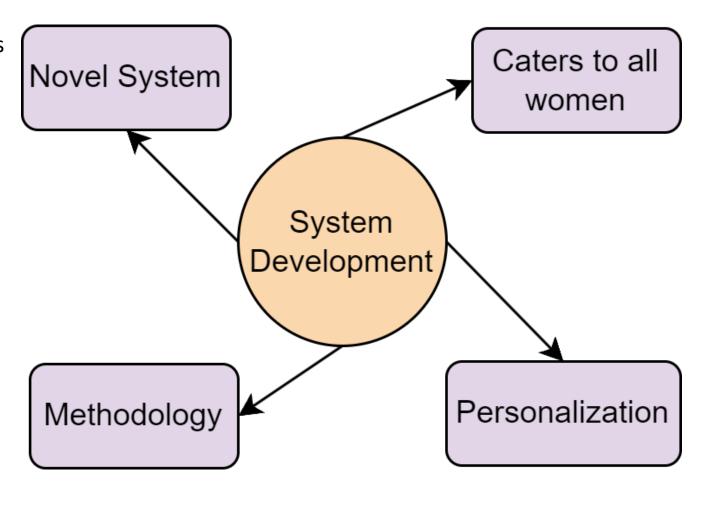

Fig 3: Information sharing shows increase in proper protection by 64.3% [6]

Why Novel?

A novel system that looks to aid menstrual and menopausal health by providing quick and easy access to relevant information

We use state-of-the-art retrieval **Neural Network models** and pair it with state-of-the-art fine

tuning such as **RLHF**.

A multimodal system that allows women of all caste/setting to access our system.

Tracks person's searches and requests, and provides answer personalization accordingly.

Appropriateness and Feasibility

1. Appropriateness:

- Does not provide unethical, controversial information
- No human interaction is required
- Does not store personal information
- Bangladesh government already taking steps. E.g. hygiene corners [7]

2. Feasibility:

- Utilizes information from the internet
- Uses state-of-the-art technology
- Data Annotation
- Scalability (Fig. 1)

Study Design

Research and Development

- Data collection, annotation and updates
- Training Methodology
- Tuning and Refinement
- Testing

Product

- Interface development and multi-mode
- Server maintenance and multi-user system
- System maintenance and testing

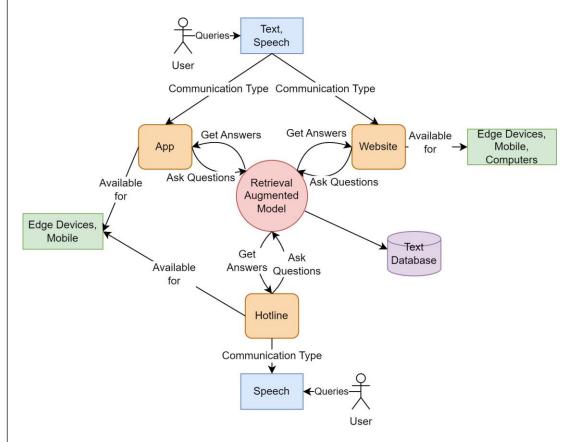

Fig. 2 Complete modules of the Meno-Chat system

Outcomes

What Meno-Chat caters to:

- 1. Aiding menstrual health that requires frequent intervention by quick/easy access to relevant information
- 2. Removing taboos and stigma surrounding menstruation.

Figure depicts scenarios the MenoChat will assist

Timeline

Budget

Phases	Timeline
A6000 GPU and computer system builds	10 lacs
Annotators for data annotation	2 lacs
Researcher Consultancy Fees	5 lacs
Machine Learning Engineer	3 lac 60 thousand
Software Engineer Fees	3 lacs
Site Fee	3 lacs
Identifying, sourcing, transforming and automating authoritative sources (and related fees).	5 lacs
